Clinical History

The claimant reportedly sustained a compensable work related nerve entrapment of the right elbow and right carpal tunnel on ___. Electrodiagnostic studies have confirmed nerve entrapment at the elbow and carpal tunnel of the right upper extremity. The claimant has failed an appropriate period of conservative management including immobilization, medications, and physical therapy.

Requested Service(s)

Right carpal tunnel release, right ulnar nerve release at the elbow.

Decision

I disagree with the insurance and find that the requested procedures are medically necessary.

Rationale/Basis for Decision

Upon review of the medical records provided, there is adequate documentation of nerve entrapment of the ulnar nerve at the right elbow and the median nerve at the right wrist, and there is adequate documentation of failure of appropriately administered conservative treatment that includes medications (Ultram, Voltaren, Motrin, Vioxx), immobilization, and physical therapy.
